reach REACH!
5 step pathfinder

REACH ChemAdvice® GmbH

What is REACH?

REACH stands for:

Registration, Evaluation and Authorisation of Chemicals

In the EU today one finds a patchwork of regulations concerning the registration of existing chemicals. Existing and new chemicals will have to be tested intensively before they get a final approval for the market. The aim is clear: REACH wants to guarantee the protection of human health and the environment from the adverse effects of hazardous chemicals. The responsibility for this has been transferred to the chemical industry. All those who manufacture or import chemicals in quantities exceeding 1 ton p.a. must have their product registered. This brochure has been designed to comprehensively illustrate and simplify the biggest legislation since formation of the European Union.

31.03.2008 sign up

01.06.2007 REACH in force

2009 onwards: Do you want to supply to European markets?

If yes, pre-registration is mandatory.

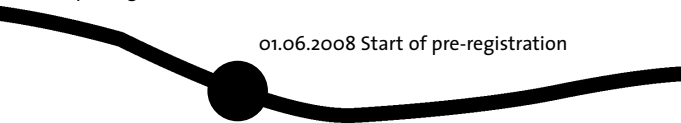

30.04.2008 sign up

31.05.2008 sign up

Who is affected by REACH?

REACH concerns all manufacturers, importers and chemical users who want to supply or use chemicals in the European Union from January 2009 onwards. Indian manufacturers who want to provide the EU with their products should take a strategic decision now. By law, only European companies are allowed to register under REACH. That gives you 3 options how to register:

1. Open up a company in the EU and get the pre-registrations and registrations done in-house (this could prove to be not only expensive, but also time-consuming, the result is questionable)
2. Agree with the customer/importer to do the registrations in their name (that means that all registrations will be in a 3rd parties name and the Indian manufacturer is short-, mid- and long-term at their mercy)
3. Get registrations done in the name of the Indian supplier by an „only representative“ in the EU (this option lets the Indian supplier keep his entrepreneurial freedom to sell whatever pre-registered to whomever)

01.06.2008 Start of pre-registration

Pre-Registration starts:
01.06.2008
*(Can only be done by a
European company!)*

30.11.2008 End of pre-registration

How does the registration work?

Any manufacturer/importer who supplies so-called phase-in substances to the EU in quantities of 1 ton p.a. or more must pre-register during the period from 01.06.2008 to 30.11.2008. In detail, the registrant identifies himself, the chemicals and the anticipated registration deadline. This deadline depends on the quantity of the respective chemical (CAS-no.).

Registration

The next step is to submit the registration dossier to the European Chemicals Agency (ECHA). After verification of the dossier the Agency will submit you the final REACH registration no.

What can REACH-ChemAdvice GmbH do for you?

REACH-ChemAdvice (RCA) offers you the chance to get your chemicals registered in your name by an “only representative” in the EU. RCA in India is exclusively represented by i-chess. The company consists of highly experienced people with one of Europe’s most relevant networks in the industry. Its head-office is located in Frankfurt, Germany.

RCA was formed by a group of senior executives with many decades of experience in the chemical industry, in collaboration with a team of REACH specialists. As an independent representative with no direct involvement in the production or trading of chemicals, REACH ChemAdvice can act on your behalf without bias. This can be extremely important, especially if you have multiple agents, indirect exports, or want to alter your supply chain into Europe, either now or in the future. And what is more: unlike most advisors, we offer the complete scope of REACH-related services in our network.

30.06.2009 Provisional end of RCA-membership

Data generation
Dossier preparation

01.07.2009 Start of actual registration

About i-chess

i-chess is an established Indian company, headquartered in Mumbai, lead by a German national. Our knowledge is based on the experience of totally more than 500 man-years in the Indian and international chemical industry. Familiar with the needs and requirements of both European and Indian companies in this business, we are glad to offer our customers a wide range of services and solutions related to REACH.

We are of the opinion that REACH is an unique opportunity to redefine the existing business. We look forward to speaking to you on the many facettes of REACH and its potential implications for your future business in Europe.

01.12.2010 final dossier for:
substances > 1.000 tons p.a.

Get your registration number. You have reached REACH.
